APPLIED BEHAVIOR ANALYSIS-BASED TREATMENTS FOR AUTISM

By: Dr. Catherine Yeager

Date: Thursday, May 29, 2008

Time: 2:00 - 4:00 PM central time

Fee: \$30 per site

Abstract: This seminar will focus specifically on early interventions based on Applied Behavior Analysis theory (i.e., "ABA," discrete trials training). Research on effectiveness of these therapies will be reviewed as will rationale and application of treatments. Common myths about ABA-type treatments will also be discussed.

Who Should Attend? This session is appropriate for parents and families of children with autism spectrum disorders, as well as general and special education professionals, psychologists, social workers, and other professionals working with children with disorders on the spectrum.

CEUs: .2 CEUs are available through Minot State University. The recording fee for MSU CEUs is \$20.00. Two contact hours for ND social workers and nurses are also available.

Phone Conference & PPT/Webinar: After registering, each site will be emailed the handouts for the meeting including the PowerPoint presentation and the toll-free telephone number to call into for the event. Participants will be able to hear the presentation during the conference call while they view the presenters' PowerPoint slides through a local slide show. The presenter has allowed time for questions during the presentation.

Technical Requirements: Participating sites need a computer with Windows 98 (or better) or Mac platform, CD-ROM drive, PowerPoint software and an LCD projector if the number of participants warrants it.

The call in number is toll free. There will be no long distance charges for sites.
